Job Description Tipping Die Finishing Machinist (Level 1)

Basic Job Functions

- Independently, or with minimum assistance, set up manual lathes and milling machines, machine small mounting hubs and related precision components.
- Hand polishing, cutting and sanding, perform a full part inspection using precision measuring tools and optical comparators
- Operate surface grinders, sand blaster and other shop equipment
- Adhere to quality and safety standards, keeping records and effectively maintaining equipment
- Actively participate in product development and production team discussions
- Enter accurate job records in the Production Control System

Experience

- 1-2 years of related hands-on experience in a machine shop environment

Education

- A 2 year degree in machining or equivalent and/or vocational training is required

Qualified candidates must be skilled in:

- Operating manual lathes, mills and other machine shop equipment
- Machining, finishing and hand-working parts to tight tolerances (+/- .0005" and better) and high surface finishes
- Full self-inspection of parts. Proficient in using optical comparators
- CNC Experience a plus
- Journeyman toolmaking papers a plus

Personal Qualities

- Self starter requiring a minimum amount of supervision
- Detail-oriented in following drawing requirements
- Good ability to work with others and a genuine interest in being part of a team
- Neat and organized
